

Modular Suspension Systems

Apart from DONN Grid Systems, USG Boral India offers four additional T-grid suspension systems. Each performs the same function of suspending panels from the overhead building structure. Covering almost every conceivable application, the designer and contractor alike have the choice of the traditional 24mm grids or the more sophisticated appearance of 15mm grids with black grooves.

Either system integrates seamlessly with USG Boral acoustical & gypsum ceiling panels to provides an extensive range of options, whether it is for acoustic, aesthetic or budget reasons.

The systems differ in design, compatibility with certain styles of panels and the resulting appearance of the finished ceiling.

- 1 **Faster installation**
- 2 **Quick lock system**
- 3 **Easy to detach**
- 4 **Easy maintenance**
